

Health Services Research in Europe: **Health care systems**

Reinhard Busse and
Marcial Velasco Garrido
TU Berlin

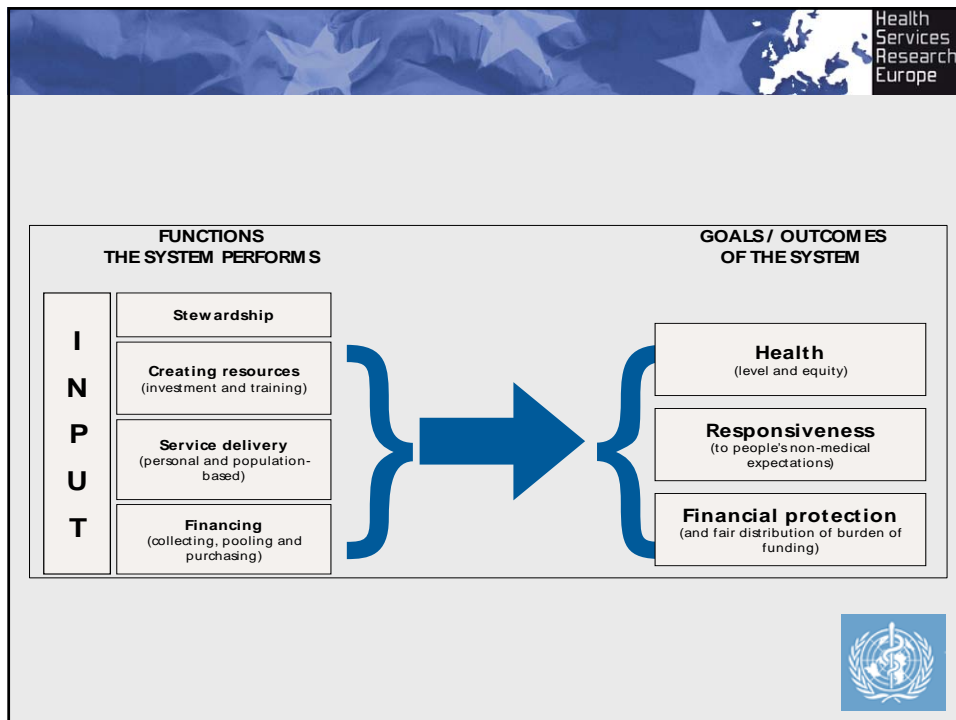

Definition of “Health systems“ (I)

people, institutions and resources,
arranged together in accordance with
established **policies,**
to improve the health of the population they
serve, while responding to people’s legitimate
expectations and protecting them against the
cost of ill-health
through a variety of activities whose **primary**
intent is to improve health.

European Observatory for Health Systems and Policies (2007).
Glossary. <http://www.euro.who.int/observatory/Glossary/Toplevel>.

Definition of "Health systems" (II)

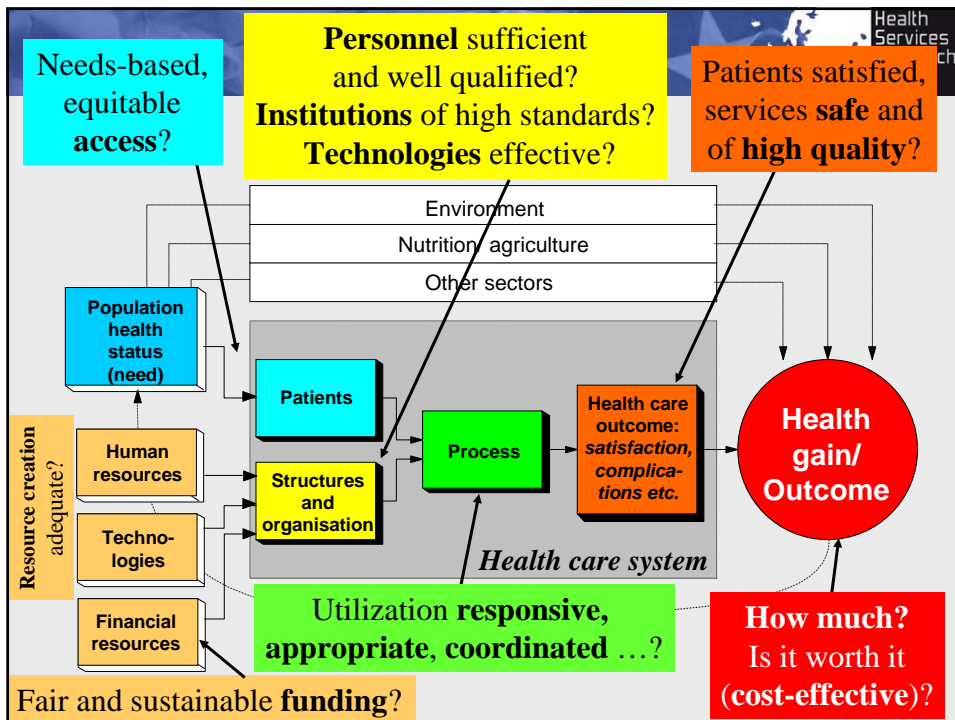

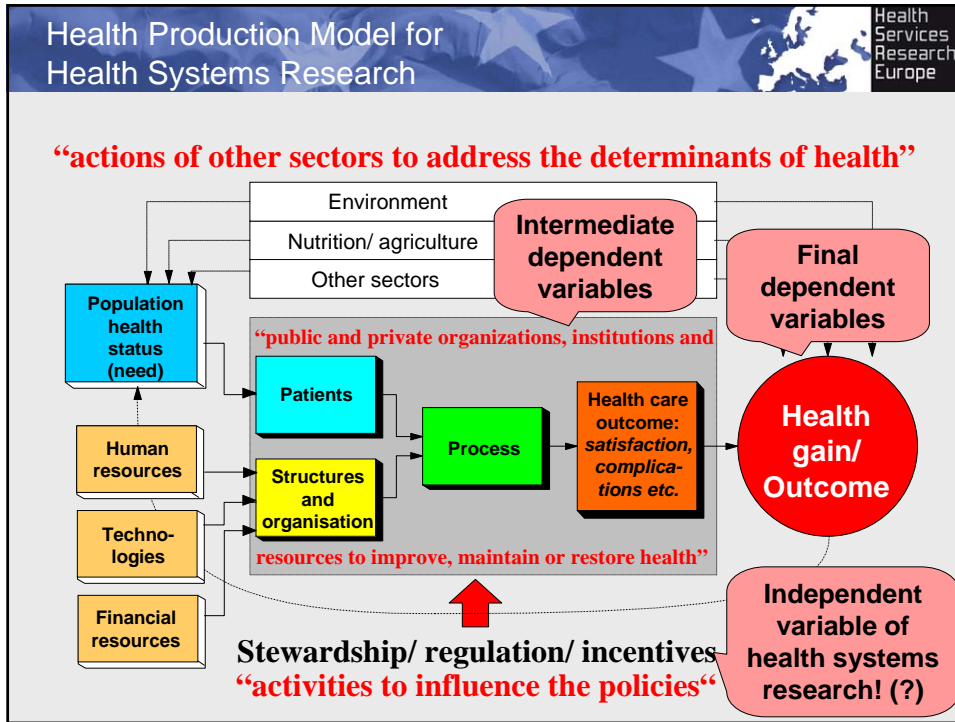

... ensemble of all **public and private organizations, institutions and resources** mandated **to improve, maintain or restore health**.

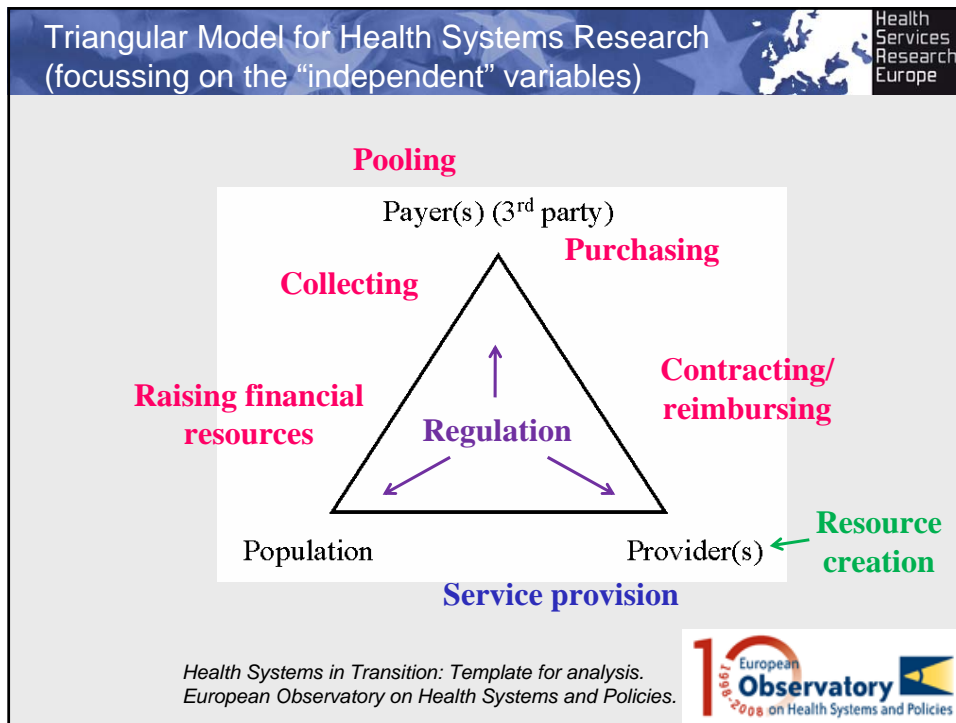

... encompass both personal and population services, as well as **activities to influence the policies and actions of other sectors to address the social, environmental and economic determinants of health**.

WHO European Ministerial Conference on Health Systems (2008). Tallinn Charter: Health Systems for Health and Wealth. Resolution EUR/RC58/R4.

The slide features a blue header with a map of Europe and the text 'Health Services Research Europe'. The WHO logo is in the bottom right corner.

Topics for Health Systems Research (I)

Area	Topics
Service delivery/ provision	Availability, supply Accessibility access Acceptability Coverage, benefit basket/ package, entitlements Waiting time, waiting lists Utilization Responsiveness, Satisfaction
Financing/ expenditure	Financing Funding Payment of providers Reimbursement Purchasing Allocation Equity/Fairness

Health Services Research Europe

Topics for Health Systems Research (II)

Resource creation	Professional education Research and Development Innovation management Knowledge generation and management Public health intelligence
Stewardship	Planning, Health Plans Health Policy, Policy Making, Health Care Reform Centralization/Decentralization/Devolution Privatisation/Recommunalisation Commissioning Licensing Accreditation Contracting

Licensing/Accreditation	3 (14)	1.3%	3 (14)	1.3%

Attribute	Value	Percentage of abstracts (n=232)
Scope	International	18.1% 
	National/Regional	81.9%
Type of Abstract	Descriptive	25.4%
	Analytical	74.6%
Methodological approach	Quantitative	50.1%
	Qualitative	10.8%
	Literature review	9.5%
	Document analysis	22.0%
	More than one	6.9%
Dependent variable	Health outcomes	3.9%
	Utilization/Costs	14.2%
	Satisfaction	4.7%
	Quality of care	2.2%
	Combination of the above	9.1%
	Other or none	65.9% 

Conclusions

Health
Services
Research
Europe

- Literature search -> sizeable amount of work but *low specificity* to identify “health systems research” (rather than HSR in general) and probably *low sensitivity* (books, grey literature)
 - Common understanding of definitions, scope and necessary/ “best” methods? Further work ...
 - However, certain areas – especially regarding impact of regulation (e.g. privatization, accreditation/ licensing) – seem under-researched
- identification of 3 topics to take discussion forward ...
